This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

REPORT

On the Census of Newfoundland, 1901.

To His Excellency Sir CAVENDISH BOYLE, K C. M. G., Governor and Commander-in-Chief in and over the Island of Newfoundland and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY;—

I have the honour to submit the following Report upon the Census of 1901.

It is provided in Cap. 27, Consolidated Statutes (2nd Series), that "the general census and returns shall be taken and made between the months of June and December in the year 1901."

As in this Colony the Educational and Road Grants are allocated to each section according to its population, it is obvious that the enumeration must not only be of the people as a whole, but also of the residents in each settlement A large number of these people can only be found at their homes during the winter season—a time when it is impossible to take the census, owing to the difficulties of communication and travel. The summer finds them at Labrador, or engaged in the fisheries off the coast of this Island, but the enumerator must count them as resident in the settlement where is their place of abode. Special provision had to be made in order to avoid duplication of entry, and in most cases the sheets were retained till December, when the majority of these people had returned home, and the sheets could thus be checked. The census, therefore, may be regarded as including all persons resident in Newfoundland and Labrador in the month of December, 1901.

I.—TOTAL POPULATION.

Taking the figures as shown by the census sheets of 1901, the population stands thus:—

Newfoundland	217,037
Labrador	3,947
Total	220,984

The following table may be of interest in this connection:—

TABLE A.

Census of	Population of Newfoundland.	Population of Labrador.	Total.
1857	122,638	1,650	124,288
1869	144,386	2,150	146,536
1874	158,958	2.416	161,374
1884	193,124	4,211	197,335
1891	197,934	4,106	202,040
1901	217,037	3,947	220,984

TABLE B.

The average per centage of increase per annum for the various periods dating from 1857:—

Period from	Average per centage of Increase per annum.	Average per centage of Increase on a ten years' basis.
1857-1869	1.49	14.90
1869-1874	2.02	20.20
1874-1884	2.23	22.30
1884-1891	.34	3.40
1891-1901	.93	9.37

It is impossible to account satisfactorily for the low average rate of increase for the seven years from 1884 to 1891. There are no figures showing the births and deaths for that period, nor are there any returns of emigration.

From the records of vital statistics, commenced in 1891, it is found that from the period, 1st August, 1891, to 30th September, 1901, there were 66,954 births and 35,505 deaths in the Colony. The excess of 31,449 would be the natural growth of the population, which, by these figures, should now total 233,489, being an increase of 15.5 per cent. for the ten years. But the population numbers only 220,984, and as the immigration is practically nil, the shortage of 12,505 must be put down as the number who have emigrated during the past ten years.

To recapitulate:—

The population in 1901 was		202,040
Add, natural growth for ten years, say 15.5 per cent.	31,449	
Less, loss through emigration, say 6.2 per cent.....	12,505	
Balance added to population, say 9.37 per cent.....	18,944	
		18,944
		220,984

II.—POPULATION BY DISTRICTS.

TABLE C.

The following table gives the population of the various Districts by the 1901 census, and also the figures for each District for former years :—

Grand Total	124,288	161,374	197,335	202,040	220,984

From the above table it will be seen that the population of the Districts of Carbonear, Harbor Grace, Port-de-Grave, and Ferryland, has declined steadily since 1884, as has also the population of Labrador.

In the table which follows will be found the actual numbers of the increase or decrease in each District as shown by the census of 1901, and the per centage of such increase or decrease, computed upon the population of the census of 1891.

Also, compiled from the returns of the Registrar of Vital Statistics, the percentage of the natural growth for each District, based on the returns of births and deaths.

The — indicates a decrease.

Taking first the actual results as shown by the figures of the 1901 census, we find by the above table that the largest numerical increase is to be found in St. John's District (Eastern and Western Divisions together). The increase of 3,968 is, however, but 11 per cent. on the population of 1891, which percentage is exceeded by eight other Districts. The Districts of Bonavista, Twillingate, St. George, Placentia and St. Mary's, and Trinity, follow St. John's in the order named, having regard only to *numerical* increase; but, taking the *per centage* of increase on the 1891 census, St. George heads all the Districts with the large per centage of 37.2, followed by St. Barbe, 21.5; Placentia and St. Mary's, 18.7; Twillingate, 15.9; Bonavista, 15.1; Burin, 14 8; Fortune Bay, 14.2; Fogo, 12.9; and St. John's, 11.0. Four Districts, and Labrador, show a decrease in population, viz.: Carbonear, 12.8 per cent.; Harbor Grace, 8.7; Port-de-Grave, 6.8; Ferryland, 2.7; and Labrador, 3.8.

In comparison with the actual figures of the census sheets, I shall now take those of columns 5, 6 and 7 of Table D, which have been compiled from the returns of Vital Statistics furnished the Registrar during the past ten years. The excess of births over deaths has been calculated for each District, and the per centage of the same computed on the population of the District in the census of 1891. Had there been no immigration or emigration, the population of each District would have been simply the natural increase added to the figures of 1891. The difference, therefore, between columns 4 and 5 will show to what extent each particular District has been affected, (*a*) by persons moving into the District, and (*b*) by residents of the District moving out of the same.

St. George's District shows the largest natural growth—30.6 per cent. The census figures show an increase of 37.2 per cent.; so that St. George not only retained the natural increment, but received 6.6 per cent. from other sources. Some of these, no doubt, came from other Districts of the Island, and some from the neighboring Canadian Provinces.

The District of St. Barbe follows with a natural increase of 23.1 per cent. But St. Barbe did not retain all this, for we find the census increase is but 21.5, showing that 1.6 per cent of the people left the District during the ten years. This, however, represents only 109 persons out of a population of 8,126. It is satisfactory and very important to note that the two Districts covering that part of the coast known as the Treaty Shore evidence a large increase of population. They lead the whole Colony in the per centage of increase, and, what is more important,

manage to retain their people within their own borders; while St. George's attracts some from the outside as well.

Twillingate comes next in order, with a natural growth of 21.5 per cent. Of this 5.6 per cent. is lost through emigration or removal to other Districts, leaving the net increase of 15.9 per cent, as shown by the census figures.

Burgeo and La Poile District ranks fourth, with a natural growth of 21.1, losing, however, 12.8 per cent. through emigration or removal, and showing a net gain of 8.3 only.

Fortune Bay has a natural increase of 20.7 per cent., but loses 6.5, thus gaining 14.2 per cent., net.

Burin shows 20.6 per cent. natural increase, losing 5.8, retaining 14 8 net increase.

Placentia and St. Mary's follows with a natural growth of 18.5 per cent., while the census figures give an actual increase of 18.7 per cent.; so that there is a gain of 0.2 per cent. from persons moving into the District. The natural growth being retained indicates that the people are settled, with no strong indications to seek homes in other places. The herring fishery in the winter and the cod fishery in the summer give them constant and remunerative employment.

Then follow Fogo, Trinity and Bonavista, which latter practically retains the natural increase. All the Districts up to this point show a greater per centage of natural growth than the average rate for the Colony, which is 15.5 per cent. Those Districts which follow are below this average.

Harbor Main comes next, but loses again 75 per cent. of the natural growth. Harbor Grace loses all the natural increase, and 8.7 per cent. as well. Port-de-Grave likewise loses all, and 6.8 per cent in addition Bay-de-Verde loses 90 per cent. of natural increase.

In St. John's District (E. and W.), the fifteenth on the list as regards natural increase of population, the per centage is only 9.6. St. John's District has, however, gained considerably through the influx of people from other parts of the Colony to the capital city, while it has no doubt

lost through the emigration of some of the population. There are no figures to show the extent of this in-coming or out-going; and, therefore, it can only be stated that the net increase is eleven per cent This is a gain of 1.4 per cent. over the natural growth, and indicates that there are more persons coming into the District than are going out.

Carbonear, Ferryland and Labrador, all lose their natural increase, and more beside.

To sum up: The showing made by St. George, St. Barbe, Placentia and St. Mary's, Twillingate and Bonavista, is eminently satisfactory. St. John's District, with a small natural increase, profits by the tendency of all people in modern times to congregate at the large centres of trade and commerce. All the Conception Bay Districts show the results of the temporary emigration of the people, and especially is this marked in Carbonear, Harbor Grace, and Port-de-Grave Districts. As it is the young men who are leaving the Colony, we see the effect in the lowering of the rate of natural increase, and this is most strongly emphasized in the Conception Bay Districts.

III.—POPULATION, ST. JOHN'S CITY.

In the enumeration of the census for the city, the Electoral Wards were taken, and not the Municipal boundaries. From the sheets, however, an approximate of the population of St. John's has been made.

—	Population.	Church of England.	Roman Catholic.	Methodist.	Presbyterian.	Congregational.	Salvation Army.	Other Denominations.
St. John's East	14,245	3,615	7,162	2,398	614	273	113	70
St. John's West	14,303	2,468	8,025	2,999	322	114	328	47
South Side	1,046	387	370	238	3	.....	48	.....
	29,594	6,470	15,557	5,635	939	387	489	117

The approximate of 1891 was 25,738; the present figures, 29,594, therefore, show an increase of 3,856, or 15 per cent.

IV.—POP'JLATION OF CHIEF TOWNS.

The population of the chief towns of the Colony, as compared with 1891, is as follows:—

	1891.	1901.
Twillingate	3,585	3,542
Tilt Cove	1,004	1,370
Little Bay	2,116	687
Fogo	1,020	1,118
Change Islands	1,011	1,067
Greenspond	1,317	1,353
Bonavista	3,551	3,696
Catalina	1,647	1,470
Trinity	1,401	1,459
Heart's Content	1,186	1,079
Western Bay	1,043	965
Carbonear	4,127	3,703
Harbor Grace	6,467	5,184
Bay Roberts	2,177	2,226
Spaniard's Bay	1,419	1,348
Brigus	1,541	1,162
Harbor Main	841	798
Conception Harbor	878	932
Witless Bay	866	864
Ferryland	549	535
Placentia	1,303	1,315
Burin	2,729	2,719
Fortune	809	937
Grand Bank	1,170	1,427
Harbor Briton	748	763
Burgeo	894	946
Channel	723	807
St. George's Harbor	1,112	1,409
Bonne Bay	1,112	1,137
Bay of Islands	979	1,263

V.—THE SEXES.

Of the population of the Island (Labrador not being included), 111,311 are males and 105,726 females, as against 100,775 males and 97,159 females by the 1891 census That is, in 1891 there were but 964 females to every 1,000 males, while in 1901 the disproportion is still greater, there being but 949 females to every 1,000 males. The returns from the Mission stations at northern Labrador are incomplete as respects sexes and ages.

VI.—AGES.

There are in the Island—

	Males.	Females.
Under 5 years of age	16,423	15,675
Between 5 and 15 years	26,613	25,175
Between 15 and 20 years	11,810	11,172
Between 20 and 70 years	53,757	50,979
From 70 years upwards	2,708	2,725
	111,311	105,726

From the above it will be seen that one-half the population is under 20 years of age, while 5,433 persons are returned as being 70 years of age and upwards, or 2.5 of the whole population of the Island.

VII.—CIVIL CONDITION.

TABLE E.

NEWFOUNDLAND AND LABRADOR.	1869.	1874.	1891.	1901.
Married Persons (Male) ..	21,202	24,402	32,280	36,936
Married Persons (Female) ..	21,246	24,380	33,395	37,007
Widowers	1,710	1,641	3,028	3,376
Widows	4,186	4,601	5,845	6,849
	48,344	55,024	74,548	84,168

Putting the above figures on a per centage basis with respect to the total population, for the purposes of comparison, we get the following:—

TABLE F.

NEWFOUNDLAND AND LABRADOR.	1869.	1874.	1891.	1901.
Married Persons (Male) ..	14.4	15.1	15.9	16.7
Married Persons (Female) ..	14.5	15.1	16.5	16.7
Widowers	1.1	1.0	1.5	1.5
Widows	2.8	2.8	2.9	3.3
	32.8	34.0	36.8	38.2

The excess of married females over married males presumably represents the husbands temporarily absent from the Colony. As it is usually the young men who emigrate, leaving the married folk behind, the small increase in the per centage of married persons may, to some extent, be put down to that cause.

VIII.—RELIGION.

Taken denominationally, the population of Newfoundland and Labrador is as follows:—

TABLE G.

DENOMINATIONS.	Census of 1901.	Per centage of Total Population.
Church of England	73,008	33.0
Roman Catholic	75,989	34.4
Methodist	61,388	27.8
Presbyterian	1,497	.7
Congregationalist	954	.4
Salvation Army	6,594	3.0
Other Denom'ns (Moravians, Baptists, Adventists, etc.	1,554	.7
	220,984	100.0

The following is a comparative statement for the periods dating from 1857:—

TABLE H.

Census of	Ch. of England.	Roman Catholic.	Methodist.	Presbyterian.	Congregational.	Salvation Army.	Other Denominations.
1857 *a*	44,285	56,895	20,229	838	347	.....	44
1869	55,184	61,040	28,990	974	338	.....	10
1874	59,561	64,317	35,702	1,168	461	.....	165
1884	69,637 *b*	75,254	48,767	1,495	768	.....	1,414
1891	70,311 *c*	72,696	53,276	1,449	782	2,092	1,434
1901	73,008	75,989	61,388	1,497	954	6,594	1,554

(a) No denominations are given for 1,650 persons resident on Labrador in 1857.
(b) Includes 637 persons who were of the Reformed Episcopal Church.
(c) Includes 487 persons who were of the Reformed Episcopal Church.

Since 1857, the adherents of the Church of England have increased by 28,723 persons, or 64 per cent.; the Roman Catholics by 19,094 persons, or 34 per cent.; the Methodists by 41,159 persons, or 200 per cent.; the Presbyterians by 659 persons, or 79 per cent.; and the Congregationalists by 607 persons, or 175 per cent.

The Salvation Army did not appear in the census returns until the year 1891.

The increase of each denomination during the past decade has been as follows:—

TABLE I.

DENOMINATION.	Increase.	Per cent.
Church of England	2,697	3.8
Roman Catholics	3,293	4.5
Methodists	8,112	15.2
Presbyterians	48	3.3
Congregationalists	172	22.0
Salvation Army	4,502	215.2
Other Denominations	120	8.4
	18,944	.....

Further details with respect to denominational returns will be found on pages 448–456 of Volume I.

IX.—BIRTHS, MARRIAGES AND DEATHS.

These important statistics are now recorded in greater detail each year by the Registrar of Vital Statistics. It may not be amiss, however, to glance at the figures given by the present and past census sheets, which represent the events of the year preceding that in which the census was taken:—

X.—BIRTH-PLACES.

From the following table it will be seen that the per centage of native-born inhabitants has increased with each census. In 1857 they formed 90 per cent. of the total population; in 1869, 93 per cent.; in 1874, 95.2 per cent.; in 1884, 96.9 per cent.; in 1891, 96.8 per cent.; and in 1901, 97 5 per cent. During the same period the number of the old-time settlers from Ireland and the West of England has been dwindling, the tide of immigration being stayed. In 1857 these numbered 9.1 per cent. of the population; they now represent only .7 per cent.

XI.—INFIRMITIES.

We find by the present census that out of 485 persons set down as deaf and deaf and dumb, 281 belong to the male sex and 204 to the female. These figures are largely in excess of those of 1891. There were 96 blind males and 129 blind females—altogether 225, against 188 in 1891. Persons of unsound mind are reckoned as 352 in number, 187 being males and 165 females. Altogether there are 1,062 persons suffering physical or mental infirmity, being 4.8 per 1,000 of the whole population. The following table makes comparison with the census returns of past years.

XII.—OCCUPATIONS.

The following table will be of interest:—

While there are but 2,475 persons who are put down absolutely as farmers (a satisfactory increase of about 50 per cent. over any previous census), there are over 40,000 fishermen and others who cultivate land, more or less, in addition to their usual occupation. This class is largely made up of the fishermen-farmers, and, it is needless to say, that those who are assiduous on the land as well as on the sea generally manage to live in comparative comfort.

a) Includes also "Doctors."

The great bulk of our population is engaged in connection with the fisheries. The figures given in the 1901 census, representing persons engaged in the catching and curing of fish, are higher than those of any previous census, viz.: 41,231 males and 21,443 females, altogether 62,674 persons. This of course does not include members of their families, who are dependent upon them, but who are not engaged in the catch and cure of fish. The figures have varied in past years, both as regards number and per centage to the whole population. In 1857, 31 per cent. of the total population were engaged in catching and curing fish; in 1869, 25.4 per cent.; in 1874, 28.4 per cent.; in 1884, 30.6 per cent.; in 1891, 27.1 per cent.; and in 1901, 28.4 per cent. Small voyages and low prices have, at intervals in the past, tended to limit fishery operations, producing the fluctuations which we observe in the numbers of those employed. At the present day the opening up of other industries in the Colony and the enticing fields of labor elsewhere are additional factors affecting the fisheries and those employed therein.

XIII.—EDUCATIONAL.

In the census for 1891 there are returned 606 persons as teachers in 1901 these had increased to 789. Previous to 1891 teachers had not been recorded as such, while the returns as respects education were meagre. The following table will give those particulars which are on record:—

[a] Includes others beside "children."

The census returns for 1891 and 1901 give more detail, as is shown in Table O.

Children living 1½ miles from school	8,358	8,462
Schools	649	783

From the above it is seen that there are 115,930 persons who can read. If we add to this 32,098 children who are under the age of five years, who could not be expected to read, it makes a total of 148,028, and leaves 72,956 persons over five years of age who cannot read. Some of these are no doubt attending school, but are not sufficiently advanced to be put down as "able to read"; but, allowing for these, there are at least 25 per cent. of our population who have not enjoyed the advantages of school training. The old folk form the majority of this number, and it will be found that their number is decreasing year by year. The beneficent result of the liberal grants towards education made from the public revenues and applied with so much prudence by the Superintendents of Education, and various Educational Boards, will no doubt be more apparent in the near future.

The returns of children not attending school are not critically correct, for the reason that the information required was not stated in a sufficiently explicit manner at the head of the column. It should have been "children between the ages of 5 and 15," etc. Some of the enumerators were aware of the generally accepted age at which children commence their school life, and they accordingly entered those children only between the ages of 5 and 15; other enumerators entered those between 1 and 15. However, the number can be arrived at from other sources with a fair amount of

accuracy. Between the ages of 5 and 15 there are 51,788 children. Of these 35,204 attended school, leaving 16,584 as not attending school, instead of 30,309 as stated in the returns. The school accommodation provided is, therefore, not as far short as it would, at first glance, appear to be. The 783 schools can accommodate 44,913 out of the 51,788 children who should attend.

XIV.—FISHERIES.

The following table gives such particulars as are recorded in the census sheets of past years. It will be noticed that in the early years the *tonnage* of vessels employed in the fisheries was quite as large as that of the present day, though the *number* of the vessels was much smaller. This is explained by the fact that the sailing vessels used in the seal fishery were included in the returns, and, being large ships, brought up the tonnage.

The use of traps has followed the decrease in number of nets and seines, but the continued increase of fishing rooms in actual use shows that there is no falling off in the prosecution of this industry. The total value of fish products for the year 1900, as shewn by the census sheets, is $6,282,381. The following table makes comparison with respect to the catch of salmon, herring, etc.

Taking the number of inhabited houses as above, viz., 39,419, we find there is provision for the total population in the proportion of 5.6 persons to each house. Labrador has, however, but 469 houses for 3,947 people, which is 8.4 persons to each house. St. John's West has 6.3 persons to each house; St. John's East and St. Barbe, 5.9 persons; while Ferryland has but 4.6 persons; Carbonear, 4.8; and Port-de-Grave, 5.0 persons. These inhabited houses afford accommodation to 43,168 families, and we find that the average of the family in the Colony is 5.1 persons. It is obvious that about 3,700 of these houses have two tenements under the one roof, and thus provide for two families.

The accommodation is better than that shown by any previous census, the average per house in 1857 being 6 8 persons; in 1869, 6.3; in 1874, 6.7; in 1884, 6.3; and in 1891, 5.9.

An improvement is also shown with respect to church accommodation. There is now one church to every 417 persons; whereas in 1857 there was one church to every 706 persons; in 1874, one church to 661 persons; and in 1884, one church to 509 persons. Within the past decade 94 churches have been built.

XVI.—SHIPS AND BOATS.

Owing to absence of detail, the figures respecting sailing vessels in the following Table, for the years 1857, 1869, and 1874, must be taken to represent all vessels of whatever tonnage. There is no record of foreign-going ships, but it is not supposed that such are included in the figures given. Being a maritime people, with the riches of the seal and codfisheries at our door, the returns of ships and boats will always be important —the increase or decrease in the figures indicating the fluctuations in the prosecution of the fisheries caused by short catches or unremunerative markets.

XVII.—LAND AND THE PRODUCE THEREOF.

The particulars required under this head seem to have caused the enumerators much trouble, and it has been necessary to exercise great care in the compiling of the results. As agriculture has not been the chief aim of the majority of those occupying land, it being considered rather as an auxiliary to other employment, there was usually some difficulty in obtaining precise information upon the points set out on the census sheets. Not that the people objected to give such information, but that they had kept no record and could give but an estimate. Some of the holdings, too, were but small and difficult to record. The general results, however, should not be far astray, and they show that our people are beginning to appreciate in a marked degree the value of the cultivation of the land. The number of acres occupied is 215,579—being not quite an acre for each inhabitant—and of these about 85,000 acres are "improved." Comparison with former census returns is best made by the table which follows:—

TABLE T.

It will be seen that since the census of 1884 there has been quite an advance with respect to the acreage of "improved" land, as also in the production of hay, oats, potatoes and turnips.

XVIII.—LIVE STOCK.

TABLE U.

—	1857.	1869.	1874.	1884.	1891.	1901.

Goats		6,417	6,910	7,934	8,715	17,355
Fowl	.....	.....	.....	.....	127,631	207,151

There has been an increase in the numbers of all live stock, and this is particularly noticeable in the case of sheep, where the number has gone from 10,737 in 1857 to 78,052 in 1901, the increase during the past decade being almost 30 per cent. Beside the above live stock, there were killed for food during the year 7,416 cattle, 23,593 sheep and 17,656 swine.

XIX.—MINES AND MINERALS.

Ten years ago the Bell Island deposit of Red Hematite Iron was not being worked and the census sheets bore no record respecting the wealth that was lying undeveloped. At the taking of the present census we find invested in the mining industry on that island a capital of $10,750.000; the buildings and plant valued at $1,482,992; ore produced valued at $478,365; and 1,100 men employed, whose wages aggregated $225,330.

The north side of Notre Dame Bay, in Twillingate District, still holds its place as a valuable mining locality. Although the capital invested seems to be less than that in the returns of 1891, the value of the

products is greater. During 1900, 71,610 tons of copper and pyrites, valued at $675,862, were brought to the surface; while in 1890 the figures were 69,061 tons, valued at $566,057. The men employed were 573 in number in 1900, and 1,202 in 1890; while the wages paid amounted to $150,411 and $354,160, respectively. Other mining properties are now being worked at Pilley's Island, Bay Verte, York Harbor, Bay of Islands, Rose Blanche, and Sop's Arm, but it was impossible to record any figures in relation thereto at the date of the taking of the census.

XX.—MILLS, FACTORIES, &c.

SAW MILLS.—In 1874 there were but 5 saw mills in the Colony, producing 2,111 M. feet of lumber. In 1884 these had increased to 55, valued at $29,095, employing 456 persons, and producing 11,455 M. feet of lumber of the value of $148,000. In 1891 there was still a further increase, but the returns of the 1901 census are away beyond all previous statistics in relation to saw mills. There are shown to be 195 saw mills, valued at $292,790, employing 2,408 persons, and producing 43,648 M. feet of lumber, 16,197 M. shingles, and 2,020 M. laths, all valued at $480,555. Trinity Bay has the greatest number of saw mills, viz., 104; but they are only valued at $47,070, and produce but $80,810 worth of lumber. Twillingate District really heads the list with 26 mills; but they are valued at $86,050, employ 775 men, and turn out lumber to value of $196,001.

The six tanneries produce goods to the value of $98,200, or $26,209 in excess of the three tanneries in existence in 1891. Breweries and distilleries, foundries, bakeries and furniture factories stand much as they did at the last census

The following table makes comparison with respect to some of the other industries in operation in the Colony:—

GENERAL.

In taking the census the Colony was divided into well-defined sections, and a sufficient number of enumerators appointed to each, 210 in all. As a number of these enumerators acted in this capacity in 1891, the experience then gained was helpful in the taking of the present census. The Magistrates and Justices of the Peace acted as revisers. The compilers, whose duty it has been to examine the sheets, correct clerical errors, make further enquiries where necessary, and compile for the printers, have been most painstaking. The utmost care has been exercised by this department in matters of detail, and I believe that the result will be seen in the issue of the census returns in a more correct and complete form than has hitherto appeared.

The provisions of the Customs' (Amendment) Act, cap. 25, 2 Ed. VII, under which the captains of vessels reporting or clearing in Newfoundland must give a statement of passengers on board, will make it possible, in conjunction with the returns of the Registrar of Vital Statistics, to make up at any time a close estimate of the population of the Colony, as well as serve as a check to the taking of the census in 1911.

I have the honor to be,

Your Excellency's most obedient servant,

R. BOND, *Colonial Secretary.*
